HOW TO CLEAN YOUR VINYL WINDOWS

1. Extreme care must be taken when cleaning vinyl windows.
2. It is imperative that no formulas containing bleach are used, including pressure cleaners.
3. Before cleaning please be advised to remove all jewelry from your hands and arms.
4. For best results allow windows to cool before washing. Hose off window vents with soft spray to remove sand or grit.
5. Some cleaners build static electricity charges that attract dust to vinyl windows and these should be avoided. Use a soft cloth and we recommend Mark I Vinyl Cleaner & Preserver or a good vinyl cleaner available from your contractor. Don’t use harsh cleaning materials. Rinse with clear water.
6. Windows should be cleaned at least every three months to reduce dust and dirt build-up that could damage the surface.
7. DO NOT lubricate any vertical units.
